
V100 kernel observations — normalized precision rooflines
unknown_profiler_method | NCU 2022.4.1.0 | stratum bb70165f0fb0
Partial first-launch / warmup samples; source stages may be unassigned
Native CUDA
CUDA.jl
KA
JACC
3438 precision projection rows
3308 warmup or phase/stage pending
3423 precision projection rows
3293 warmup or phase/stage pending
3356 precision projection rows
3226 warmup or phase/stage pending
3404 precision projection rows
3274 warmup or phase/stage pending
Achieved FLOP/s / precision peak (P / C)
DRAM intensity / precision-compatible ridge (I / R)
Modeled roof: min(x, 1)
FP16
FP32
FP64
Tensor FP16→FP32
Solid: sole precision
Hollow: mixed projection
Faint: warmup or phase/stage pending
Each point is one kernel–precision observation; no benchmark averaging or causal diagnosis.
Clock-adjusted modeled ceilings; scalar add/mul/FMA and reviewed tensor work. Other costs omitted.
