V100 kernel observations — normalized scalar rooflines
Partial first-launch / warmup samples; source stages may be unassigned
Native CUDA
218 scalar projection rows
20 pending stage review
CUDA.jl
217 scalar projection rows
19 pending stage review
KA
217 scalar projection rows
19 pending stage review
JACC
217 scalar projection rows
19 pending stage review
Achieved FLOP/s / precision peak (P / C)
DRAM intensity / precision-compatible ridge (I / R)
Modeled roof: min(x, 1)
FP16
FP32
FP64
Solid: sole precision
Hollow: mixed projection
Faint: stage review pending
Each point is one kernel–precision observation; no benchmark averaging or causal diagnosis.
Clock-adjusted modeled ceilings; add/mul/FMA only. SFU, integer and atomic costs are omitted.
